

*Climate measures*

1a) Name the different climate adaptation and climate protection measures of your destination and put them in the table.

	Vietnam	Spanien	Amsterdam
Climate adaptatio			
Climate protection			

1b) Find a partner who picked another destination. Exchange information about the various climate protection and adaptation measures and complete your table.

2a) Read the excerpt from the following Reflectory:

„It is important to reduce climate-damaging greenhouse gases worldwide. The big question is who has to reduce how much and who pays for it. The basis for these considerations is the principle of common but differentiated responsibility for all. At the next international climate conference, different principles and solutions for the necessary reduction of greenhouse gases are being discussed.”

2b) Which principle did you choose? Explain your decision with the help of material M9 | Principles of Global Climate Justice.

I choose

- the Grandfathering principle
- the Polluter-Pay principle
- the Per capita emissions principle
